

PROFITEC SN1

SOFTWARE – FREE RECTIFIER

Input:

380/400/415/500/690 V 3-phase

DC-Output:

24 V 100 – 2500 A

60 V 63 – 630 A

110 V 63 – 630 A

220 V 40 – 1250 A

The Power Plant Charger

Engineering is our business

Power supply systems from AEG Power Solutions ensure the continuous availability of all global requirements in oil & gas, power generation, transportation and other heavy industries.

With more than 50 years of experience in nuclear power technologies and with customers around the world, AEG PS is a truly global player and one of the premier suppliers of equipment for nuclear and fossil power generation.

Main features:

- » 100 % analog controlled charger
- » No software or programmable devices
- » Seismic-proofed technology
- » Forced or natural air cooling
- » Secure DC supply in any case of input voltage variation
- » Top or bottom entry
- » Maximum reliability
- » High availability/MTBF
- » Design lifetime >30 years
- » Designed for use in harsh environments
- » Easy maintenance via diagnostic device
- » 160 % input overvoltage threshold

PROFITEC SN1 SOFTWARE – FREE RECTIFIER

Highlight

The Profitec SN1 is a 100% analog charger. All regulation and monitoring PCBs (built up in SMD method) contain no software and no programmable components or devices. The invention of a 100% free-of-software rectifier is due to the security of DC power supply and new requirements for safety and qualification processes.

Options

» Overvoltage limiter (Forsmark-event)

In case of input voltage variation, independent of the input voltage gradient, the duration and its maximum value, the patented overvoltage limiter reduces the value of the DC output voltage to less than 115% of the nominal DC voltage. The overvoltage detection is a self-acknowledging fault.

» Parallel mode (for output current extension or redundancy)

» Diagnostic device for annual checks as required by NPPs

» Forced cooling for ambient temperatures up to 50° without de-rating

» Design as +/- system

» Higher IP rating

» Battery feeder cubicles, seismic-proofed

» Battery symmetry monitoring

» Battery charging circuit monitoring

PROFITEC SN1

Rectifier type		D 400G .../... BWLrug							
Connected voltage*		3 x 400 V ±10% / 50 Hz with N conductor							
Type series		24 V / 60 V / 110 V / 220 V							
Overall efficiency	24 V unit		60 V unit		110 V unit		220 V unit		
	approx. 85%		approx. 88%		approx. 91%		approx. 93%		
Power factor cos φ	24 V unit		60 V unit		110 V unit		220 V unit		
	approx. 0.72				approx. 0.78				
Type of battery and number of cells	24 V unit		60 V unit		110 V unit		220 V unit		
	11 – 13	18 – 20	27 – 30	43 – 46	50 – 55	80 – 85	100 – 110	160 – 170	
	Cells Pb	Cells NiCd	Cells Pb	Cells NiCd	Cells Pb	Cells NiCd	Cells Pb	Cells NiCd	
Characteristic line		IU to DIN 41 773							
Thyristor circuit*		6-pulse circuit							
		24 V unit		60 V unit		110 V unit		220 V unit	
Voltage ripple		5 % SS without parallel battery							
Spurious emissions		to EN 61000-6-4 interference to EN 55011 class “A”							
Noise immunity		to EN 61000-6-2							
Design		Steel cabinet with front door, seismic-proofed Double door cabinet width from 1200 mm Top or bottom entry							
Cabinet protection*		IP20 (standard) to EN 60529 / IEC 529							
Cooling system*		Air natural cooling							
Noise level		≤65 dB(A)							
Ambient temperature		0°C to +40°C (+50°C forced air cooling)							
Color*		RAL 7035, structured (powder coated)							

*Different input voltages and frequency, higher IP rating, forced cooling, different color or different thyristor circuit on request.
