Product description

The **Pole Mount** is designed for conductive battery charging of the BEV (Battery Electric Vehicle) or PHEV's (Plug-in Hybrid Electric Vehicles) on board batteries at public access charging locations, where usage simplicity and functionality are important. Equipped with one Mode 3 charging outlet (power ranging from 3,7 kVA to 22 kVA), can charge any EV compatible vehicle with IEC61851.

Using easy installation procedures and requirements, the **Pole Mount** can be also mounted in a wall, allowing versatile installation options.

Each Efacec **Public Charger** can be integrated in a charging infrastructure network and its operation and status is controlled by the central management system.
